PROFESSIONAL EXPERIENCE

Emtec Inc
February 2022 - Present
Position-Associate Software Development Engineer

- Collaborated on **debugging** and **fixing bugs**
- Added **new feature** on the existing **live** website
- **Built independent standalone components** on react, which are being used at multiple places on live app.
- Involved in writing **unit test cases** and doing **code reviews** of team members.

Emtec Inc
August 2021 - February 2022
Position-Trainee Software Development Engineer

- To get the proper grasp of concepts, worked on different POCs.
- Worked on tickets that required **CSS fixes and functional fixes**.
- Got familiar with how **Jira** is used to plan and **execute tasks in sprint** and importance of following the deadline for the same.

PROJECTS

E-commerce Website
February 2022 - April 2022

It is a **full-stack** website, built from scratch, implemented **authentication and authorization** for every user, used JWT token.
Used Stripe to handle payment. Styled Component to handle UI part and REST API to handle get, post, delete requests from frontend.

Tinder Clone
March 2022 - March 2022

- Implemented routing and created a tinder-like UI along with chat system and **deployed it on firebase**.
- For frontend **Material UI** is being used.

Tesla Clone
January 2022 - January 2022

- Small POC, tried implementing the knowledge I had on **styled components** and created a tesla website look alike.
- Got to learn how **powerful and clean** styled component actually is

Employee Management System
July 2021 - September 2021

- This App is based on React Components, functionalities like **adding new Employee, editing Existing ones and deleting employee data** can be performed in this app.
- All data is being stored inside **JSON server.**
- For CSS part have used **semantic UI**
